1. The compatibility matrixes are provided as per relevant product technical specifications. Compatibility with OS service pack and latest OS patches may vary. Guidelines for common operating systems are available in LankaSign product page.
2. Different token models vary in prices and are primarily used for different application compatibilities and are subjected to availability.
3. LankaSign digital certificates are not automatically trusted by internet browsers and other applications and requires manual installation and trust enforcements. Please reach out to our Helpdesk for more information.
